I provide supervision and consultation for professional Counsellors for their private practice and agency work as well as University students for their agency placements and requirements for registration.

As a Clinical Supervisor/Consultant, my goal is to help deepen and broaden your clinical expertise, competence, professional identity and counselling skills. I encourage you to bring forward issues from specific cases, reflections on your interventions and how your well-being may be appearing in your work. I will aim to create a sense of safety and trust so that we can work together respectfully and professionally. I will support both your personal and professional development.

I work from a trauma-informed, strengths-based and feminist perspective. I aim to create equity within our different responsibilities. Part of my role will be to give you consistent feedback to help with the development of your clinical and ethical work.

Area of Supervision:

- Clinical Supervision
- Clinical Consultation
- Group Supervision

Type of Services
