I support new counsellors and school counsellors in navigating their identity as professionals, maintaining ethical boundaries and externalizing the moral distress that may arise from work within systems. My priorities in collaborative consultation are to challenge what we think we know about the practice of counselling and our roles within that structure. The biggest influences on my approach towards clinical consultation is an intersectional feminist perspective, critical pedagogy, and mindfulness.

Area of Supervision:

- Clinical Consultation
- Peer Consultation

Type of Services

- Online/Remote
