I have over 30 years experience working with children, youth and families in a variety of contexts. Early in my career I have provided practicum supervision for Child and Youth Care BA candidates, and since 2012 I have provided clinical supervision for Master's level students in Counselling in both Child and Youth Mental Health services and in our local School District. I have also participated in psychiatric and peer consultation, as well as group facilitation supervision.

I received my Approved Clinical Supervision designation in April 2024, and have attended the Supervisor of Supervision Orientation hosted by BCACC in August 2024.

I have recently retired from my work with a local school district and am entering private practice where I hope to add clinical supervision opportunities in my work. I am passionate about supporting other's in their growth and development as I have been forever grateful for the supervision and mentorship I have received during my career.
