There is wonderful depth and growth that happens in the context of supervision, both clinically and as the person of the therapist (POTT). Life experiences mark us all as human beings, a journey that has brought us to where we are now and naturally affects how we enter the therapeutic space. Along with skill development, the POTT becomes an essential part of the clinical and ethical role of the psychotherapist/counsellor.

Please consider this an invitation to collaboratively engage in professional growth and development whether in formal supervision or in consultation. My approach is person of the therapist focused through a developmental attachment lens. Clinical skill development approach is determined and established based on the goals set by the supervisee. I look forward to meet you, and find passion in the collaboration towards the depth and breadth of development in the important work of Psychotherapy/Counselling Therapy.
