I have been providing Clinical Supervision since 2003, for Psychotherapists as well as Marriage and Family Therapists.; I have supervised Interns, new and developing therapists as well as experienced professionals. I have experience providing Clinical Supervision in Community Mental Health organizations as well in Private Practice. I have taught Clinical Supervision courses since 2011.

As a Clinical Supervisor, it is my priority to create a rich learning space for supervisees where they can develop and sharpen their clinical competence to delve into complex clinical issues, and get well versed in drawing upon a wide range of theoretical frameworks. I am a Systems thinker and always insist on integrating systems thinking in case conceptualizations and treatment planning. In supervision conversations, we are always exploring contextual and relational aspects of any situation. I am interested in focusing on "Cultural Competence" as well as "Safe and Effective Use of Self" as essential skills in all therapists I supervise.
