I am a seasoned Counsellor, Art Therapist and Clinical Supervisor (RCC-ACS, CCC, RCAT, BCATR) with over two decades of experience. I offer strengths-based, developmental, art-based, experiential individual and group supervision. My work as an entrepreneur, counsellor and art therapist has been recognized with professional awards, which reflect my commitment to delivering support across diverse settings grounded in ethical care, cultural humility, and relational presence.

I've supported Master of Counselling and Art Therapy students toward their development of skills and competencies required to enter the counselling field with confidence. Expressive modalities foster rich, creative reflective opportunities that support "the person-in-the-therapist that is woven throughout all stages & professional activities: planning and preparation, screening, record keeping, intake, service delivery, termination and aftercare. My contributions include, but are not limited to, course design, site development, co-facilitation, assessment and evaluation. I've supported clinicians across non-profit organizations, Indigenous rural settings, EAPs, hospitals, Vancouver Downtown Eastside, private clinics, and schools.

I am pleased to offer supervision of supervision and clinical supervision for those seeking supervision to qualify for their ACS designation.
